S.B. ENGINEERING WORKS

IMPROVING QUALITY OF PRODUCTS

PRECISION MACHINES WITH GLOBAL TECHNOLOGY

LEADING MANUFACTURERS OF

Fertilizer Plant, Zinc Sulphate,
Magnesium Sulphate and
Ferrous Sulphate

Friction Screw Press

Steel Power Kolhu

Cane Crusher Parts

Super Phosphates

Stone Crusher

Cement Plant

Paper Mill Machinery

Company profile

Products

S.B. Engineering Works was established in 1992 styled S.B. with a goal to achieve a revolution in the field of machinery by improving the quality of products. The promoters of the Company set up their engineering facility at Roorkee Road, Muzaffarnagar (U.P.) India.

OUR SET UP

Our designing, manufacturing, fabrication and consultation facilities are in Muzaffarnagar, Uttar Pradesh. The large workshop has the latest technological equipments and highly qualified manpower. We design manufacture / fabricate and rendering consultation for fertilizer plants like super phosphates, N.P.K, etc. on a turnkey basis as well as for various other mechanical machines. We are capable of running fertilizer plants on a contract basis with minimum maintenance by technical expertise.

The enterprise was promoted by Mohammad Yameen, the proprietor, who has completed 20 years in development, manufacturing, application and consultation of various industries. He has made an outstanding contribution to national development through emphasis and self-reliance. It is due to his highly dedicated efforts ever 20 years, S.B Engg. Works became virtually self-sufficient to design, fabricate and commission entire plants individually with advanced technology.

OUR COMPANY QUALITY POLICY

Total customer satisfaction with quality and timely delivery by implementing the procedures with continual improvement.

Operating in a competitive environment, S.B Engineering Works is an agriculture manufacturing unit. It has been expanding continuously ever since 1992 under the stewardship of Mohammad Yameen.

The company has a qualified and technical staff to achieve its goals with totals customer satisfaction. We are dealing with various Limited companies for the last 15 years with a positive record.

At S.B Engineering Works, we are dedicated to enhance productivity and technology; to stay on top of the quality ladder every step of the way with an aim to be a truly global company. We measure our growth by how well we align ourselves to the needs of our customers.

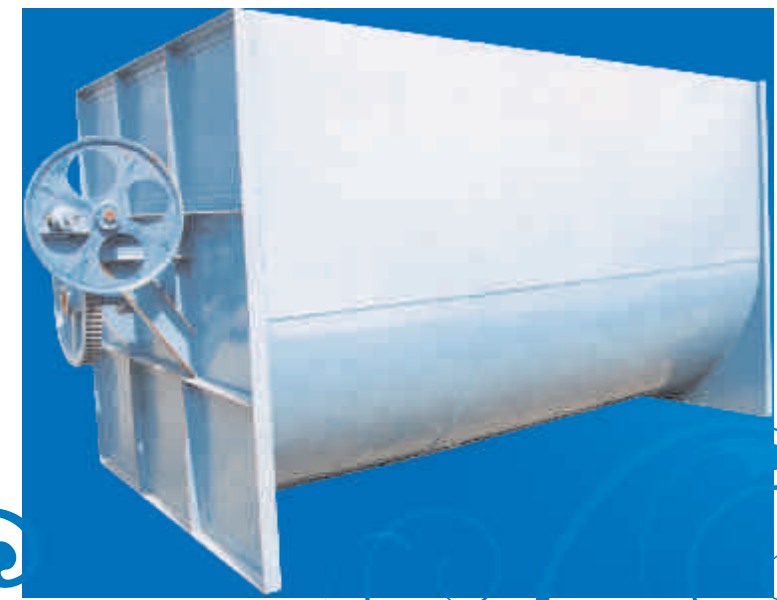

◀ Crystallizer

This unit can make 20 KL. Mother Liquor in 12 hrs. Which produce approximately 5-6 MT. Product.

Horizontal Crystallizer
Mother Liquor
Filter Press
MT

Filter Press is the transfer and distributing machine. Complete reactor solution goes for filter in the filter press. It is 25 KL. Mother Liquor can filter in 2-3 hrs. only and transfer into crystallizer and waste material will be stay in the filter press.
Size : 36" x 36", with P.P. Plate, Hydraulic and Non-hydraulic

◀ Centrifugal Machine

This machine very useful for making finished goods. In crystallizer solution will be cool with the help of cooling water approximately in 7-8 hrs. Then all cooled solution goes to in centrifugal machine. Mainly this unit work is finding finished goods in the solution and now goods ready for dispatching.

Friction Screw Press

Friction Screw Press for refractories fire bricks,
With floating table
2 Pillers and 4 Pillers
Capacity: 80, 100, 150 tonnes
Motor 15 hp without compressor

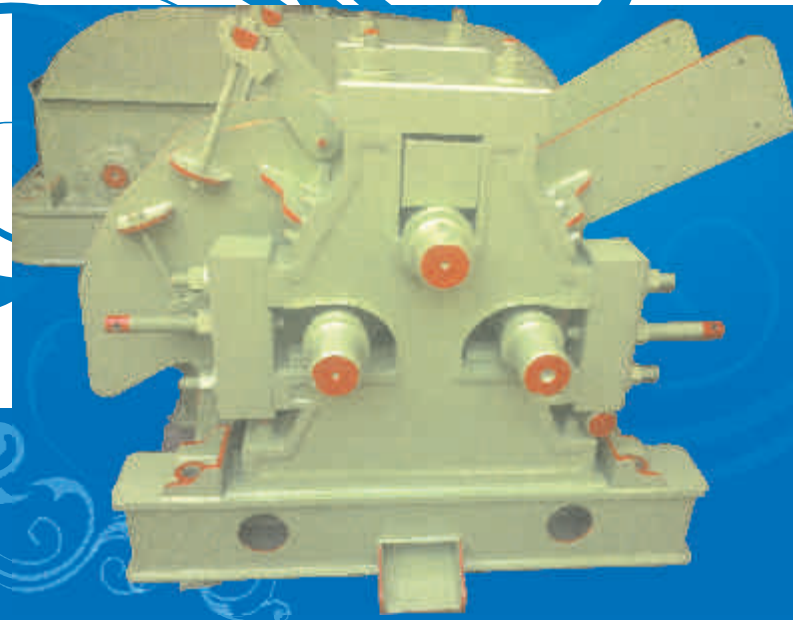

Vibrating Screen

Efficiency: screening high and capability processing strong parameters, technical advanced structure, original an has screen vibrating circular.

The circular vibrating screen adopts a cylinder-type eccentric shaft vibration exciter and partial block conditioning amplitude, which makes it easy to maintain

Capacity
3 Rollers
6 Rollers, hydraulic
Capacity per d

Machined for Excellence

S B Engineers are pioneers in the manufacture the steel power Kolhu in India and supply of Electric Kolhu throughout the country. In a nation where the proverbial sweet tooth is a way of life, molasses [gur] and sugar are essential to the lifestyles of teeming millions.

- Size : 18 x 18
- Capacity : 250 x 300 quintal/day
- Recovery : 67%
- Power Motor : 20 HP
- Engine : 30 H P
- Pulley Size : 36"
- Body : Steel Casting
